

SENATOR KREMER: Just delete "vehicle", I think would do it. Just delete the word "vehicle". Then it would be "motor fuel" then. That would cover irrigation motor, tractors, and so on, wouldn't it not? We delete the word "vehicle".

SENATOR CARPENTER: I would presume if you struck the word "vehicle", it would be all inclusive.

SENATOR KREMER: I think it would.

SENATOR CARPENTER: Well, Mr. President,

SENATOR KREMER: Is this all right with you, Senator Carpenter?

SENATOR CARPENTER: Oh sure. Let me say to any other member of this body, this is probably going to be the last time you are going to have any opportunity to interject your opinion in this. If you have any desire to broaden the interpretation, I have no objection to it. So I will move, Mr. President, we..that we reamend the bill before we attempt to move it. In line 9, strike out the word "vehicle". In line 9, strike out the word "vehicle" and leave the rest of it as it was. Now, is there another "motor". Let's see, also on Line 5, I presume, you will have to strike out the word "vehicle" in there.

SPEAKER: Senator Carpenter, that refers to specific section.

SENATOR CARPENTER: Well, we will instruct the clerk, wherever the word "vehicle" is there, to strike it out. It is there in line 5, in line 9, in line 2 in paragraph 2. I don't see it, offhand, in any other area. And I want the record to show the intent of the Legislature is, in case it goes to Court, to broaden the term so it would apply to any type of fuel which was in operation..of operating any kind of a motor, whether an automobile, tractor, or anything that has to be moved by fuel.

SPEAKER: Mr. Clerk, do you have the amendment there, so...

CLERK: Well, I have the one in line 9 and the one in line 2, there, but in line 5 in the first subparagraph, I think that is by definition incorporated in 66-401 so it doesn't make any difference what you call it there. It still is defined in that section.

SPEAKER: I have three lights on here. I wonder if I could recognize the first man that had his light on. Senator Dickinson, then Senator Kelly.

SENATOR CARPENTER: Senator Dickinson has a point, for example, you think that ought to apply to other types of fuel used for drying and things of a like nature. I realize this is doing it a little haphazardly but time is..all we've got and it is running out and I think we ought to adopt this amendment today and move it on, so we can pass it this week if that is the desire of the body. Does anybody have a suggestion as to how that would improve that type of activity. Do you have, Senator Dickinson?

SENATOR DICKINSON: Mr. Speaker, I just...

SPEAKER: The chair recognizes Senator Dickinson.

SENATOR DICKINSON: Just visiting with Senator Carpenter a moment, I am not sure what you are going to enter. As he says, we are doing this in a hurry but if we are talking... this is going to apply on through this agricultural season and any other users, and there is a lot of fuel used in the fall of the year for crop drying that is used strictly to run a burner to create heat which would not be covered by motor. Now, I don't know whether he wants it to apply to this
